– The MAILING DATE of this communication appears on the cover sheet with the correspondence address –

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 10 March 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-54 is/are pending in the application.

***DETAILED ACTION***

1. Claims 1-54 are pending in this office action.

***Acknowledges***

2. Receipt is acknowledged of the following items:
  - Information Disclosure Statement (IDS) filed on 08/23/2001 and 03/26/2004 and made of record as Paper No. 2 and 7 respectively. The references cited on the PTOL 1449 form have been considered.
  - The preliminary amendments have been considered.

***Specification***

3. The disclosure is objected to because of the following informalities:
  - The title of the invention should be brief but technically accurate and descriptive, preferably from two to seven words.
  - The disclosure is objected to because it contains an embedded hyperlink and/or other form of browser-executable code. Applicant is required to delete the embedded hyperlink and/or other form of browser-executable code. See MPEP § 608.01. The embedded hyperlinks are on pages 1 and 6.
  - At page 5, line 24, "service Website 10" failed to disclose figure 1 which related to this reference.

Appropriate correction is required.

### **Claim Objections**

4. Claim 7 is objected to because of the following informalities: at line 1, "claim 7" depends on itself. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-10, 14-53 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1, 3, 6, 7, 14, 18, 19, 21, 22, 23, 28, 29, 35, 36, 40, 41, 47, 49, 51, and 53, there is insufficient antecedent basis for "substantially" in the claim. The term "substantially" is obscure.

Regarding claim 16, there is insufficient antecedent basis for "a description of information regarding the supplier corresponding to the supplier" in the claim.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-6, 8-17, 24-34, 36-46, and 48-54 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rebane (US 6,662,192), in view of Fenton (US 2002/0194151).

Regarding claims 1 and 11, Rebane discloses a method to identify a supplier of goods or services over the Internet comprising:

providing a home page/index page ("infomediary website") for a user having at least one link to a directory Web site for a class ("category") of goods or services having a directory Web site domain at least partially descriptive of the class of goods or services wherein said directory Web site contains a supplier link to a corresponding supplier's Web site (See Fig. 16, 18, and 20, and col. 31, line 62 to col. 32, line 12), wherein the home page and the directory Web sites are configured to allow a user to access the homepage (See col. 32, lines 13-31); select a user determined directory Web site based at least in part on the directory Web site domain name and activate the user determined directory Web site link corresponding to the directory Web site selected by the user link to the selected directory Web site and select the supplier link for a supplier of goods or services (See page 32, line 57 to page 33, line 67).

Rebane further discloses activate the first user determined supplier link to the corresponding user selected first supplier link, thereby launching a first supplier internet browser window and displaying the supplier Web site in the first supplier internet browser window (See Fig. 20 and corresponding text) as per claim 11.

Rebane does not explicitly teach a rollover window wherein the rollover window conveys information about a supplier corresponding to the supplier link when the user's cursor is placed substantially over the supplier link. On the other hand, Fenton teach a rollover window (See

Art Unit: 2171

[0109], Fenton et al.). Because Fenton system use to index websites' content, it would have been obvious to one having ordinary skill in the art at the time of the invention was made to include a rollover window into the website of Rebane as suggested by Fenton. The motivation would have been providing useful information about suppliers to user so that user can decide whether to make further move.

Regarding claims 2 and 13, Rebane/Fenton discloses the directory Web site further comprises a first paragraph of text comprising a description of the class of goods or services ("Home>Computer Hardware&Software>PDAs", Fig. 18, Rebane).

Regarding claims 3 and 14, Rebane/Fenton discloses wherein the directory Web site further comprises a descriptive title portion substantially corresponding to the description of the class of goods or services described by the directory Web site domain name (Top BizRater PDA, Fig. 18, Rebane).

Regarding claims 4 and 15, Rebane/Fenton discloses wherein the directory Web site further comprises a link to the home page (home, Fig. 20).

Regarding claims 5, 6, 16, and 17, Rebane/Fenton discloses the directory Web site further comprises a supplier descriptive portion corresponding to the supplier, wherein the supplier descriptive portion is located substantially adjacent the corresponding supplier link (See Fig. 20).

Art Unit: 2171

Regarding claims 8-10, Rebane/Fenton discloses wherein the rollover window conveys information visually/audibly to the user and utilizes a script (See [0039], [0090], Fenton et al.).

Regarding claim 12, Rebane/Fenton discloses selecting a subsequent user determined supplier link for a subsequent supplier of goods or services; and activating the subsequent user determined supplier link to the corresponding user selected subsequent supplier Web site thereby launching a second supplier Internet browser window and displaying the subsequent supplier Web site in the second supplier internet browser window (See Fig. 20, Rebane).

Regarding claims 24-25, 36-37 and 48, these claims contain all the claimed subject matter as set forth above in claims 1, 3, and 6, thus rejected as the same.

Regarding claims 26-27, and 38-39, Rebane/Fenton discloses wherein the directory web site comprises a first set of supplier links and a second set of supplier links (See Fig. 20, Rebane).

Regarding claims 28-29, and 40-41, Rebane/Fenton discloses wherein the first rollover window is substantially visible when the first set of supplier links is substantially visible (See [0090], Fenton et al.).

Regarding claims 30, 33-34, 42, and 45-46, Rebane/Fenton discloses wherein the directory Web site comprises a second rollover window (See [0090], [0109], Fenton et al.).

Regarding claims 31-32 and 43-44, Rebane/Fenton discloses a plurality of directory Web sites (See Fig. 18, Rebane), wherein each directory Web site contains at least one link to at least other directory Web site (See Fig. 18 and 20, Rebane).

Regarding claims 49, 51, and 53, these claims contain all the claimed subject matter as set forth above in claims 24, and further discloses access a convention search engine; input a

Art Unit: 2171

search strategy into the conventional search engine to search for a supplier of a user determined good or service; view ranked result links as analyzed by the conventional search engine's algorithm and displayed by the conventional search engine; and activate a ranked result link corresponding to the directory web site corresponding to the user inputted search strategy thereby allowing the user to access the directory web site corresponding to the user inputted search strategy. Please see col. 31, line 62 to col. 32, line 12, Rebane.

Regarding claims 50, 52, and 54, Rebane/Fenton discloses wherein the directory Web site further comprises a related directory Web site link (See Figs. 18 and 20, Rebane et al.).

7. Claims 7, 18-23, 35, and 47 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rebane (US 6,662,192), in view of Fenton (US 2002/0194151), and further in view of Perkes (US 2002/0194601).

Regarding claims 7, 18, 35, and 47, Rebane/Fenton discloses all the claimed subject matter as set forth above, however Rebane/Fenton is silent as to wherein the directory Web site comprises at least one substantially descriptive metatag. On the other hand, Perkes teach descriptive metatag (See [0042], Perkes et al.). It would have been obvious to one having ordinary skill in the art at the time of the invention was made to include descriptive metatag into the directory Web site of Rebane/Fenton. The motivation would have been to cover all possible related searches and increase the ranking archived as suggested by Perkes.

Regarding claim 22, this claim contains all the claimed subject matter as set forth above in claims 1, 3, 6, and 7, thus rejected as the same.

Art Unit: 2171

Regarding claims 19-21, this claim contains all the claimed subject matter as set forth above in claims 22 and 49, thus rejected as the same.

Regarding claim 23, Rebane/Fenton/Perkes discloses wherein the rollover window utilizes a script (See [0039], [0090], Fenton et al.).

### ***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Snyder U.S Patent No. 6,643,641 discloses web search engine with graphic snapshots.

Holbrook U.S Patent No. 2002/0152222 discloses apparatus and method for organizing and-or presenting data.
